

Silver Award Project Utility

Facility: Dialysis Clinic, Inc--Sedalia
Silver Award User: Kaitlin Thiel

Project Status: Active ▼ Update Status

1. Description of Project:

Utilize skeleton with calcification pictures on various parts of the body to encourage patients compliance.

2. Outcomes Measured:

Amount of patients who have taken steps toward better diet and binder compliance.

3. Summary of Outcomes/Results:

Patients have recognized the effects of calcification from skeleton pictures and are being more compliant with taking binders. Some patients have agreed to take a stronger binder to help prevent calcification.

4. Impact on Patients:

Overall a great way to educate and showcase calcification, which impacted the patients and increased patients compliance with diet and binders.

5. Lessons Learned:

Finding different ways to educate patients has been effective. Using visualization to show calcification was more helpful than just speaking to the patients.
